4.2. Software Installation and Initial Configuration {#sec4.2} ----- 1. After downloading the software, first run "FileManager.exe"; This will initiate the software installation.2. Software installation should take about 10 min. After installation, use "FileManager.exe" to navigate to "Program Files" folder; The software installs into "Asphalt 7 -- External" directory.3. If the software is not able to find your license file, your license file was lost during the initial installation, please follow these steps to generate your license file:1. Navigate to the program directory "Asphalt 7 -- External";2. In the program directory, select the menu "License";3. Click "Change";4. Select "Agilent License File" and click "Next";5. Enter your license number and click "Save";6. Click "Done" to generate your license file; Click "Start" to launch the software;

4.3. License Renewal and Software Update {#sec4.3} ----- 1. "FileManager.exe" will notify you that license will expire in 30 days, click "Next"; 2. Enter your license number and click "Next";3. Select "Software Update"

under the menu "Options";4. In "Download Policy" menu, select the "Asphalt 7" software version you want to update;5. If necessary, update the software;6. Enter your license number again, and click "Next";7. The software update may take several hours to finish; Click "Start" when the update is completed. 4.4. Manual-Pan Tilt-Drive setup {#sec4.4}

----- 1. Calibration is the first step for Manual-Pan Tilt-Drive system setup; For manual calibration, insert a metal ring into the 3-arm and select "Calibrate";2. Select "Calibrate Ring" under the menu "Options";3. While watching the calibration page, move the ring back and forth; Go down to next step "Setup"; 4.5. Setup {#sec4.5} ----- 1. Ag 82157476af
